

Adventures of a Young Naturalist

Originally published in 1870, this early work on Adventures of a Naturalist is both expensive and hard to find in its first edition. There is no country on the face of the earth that possesses greater interest in the eyes of the scientific or travelled than Mexico. Chapters include; Who we are, Waking up in the morning, The great forest and a vulture feast plus many more. With 117 illustrations, this is a fascinating novel of the period and still an interesting read today. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.
