

## The Time Machine

Wells is now best remembered for his science fiction novels and is called the father of science fiction, along with Jules Verne and Hugo Gernsback. His most notable science fiction works include *The Time Machine* (1895), *The Island of Doctor Moreau* (1896), *The Invisible Man* (1897), and *The War of the Worlds* (1898). He was nominated for the Nobel Prize in Literature four times. Wells is generally credited with the popularization of the concept of time travel by using a vehicle that allows an operator to travel purposely and selectively forwards or backwards in time. The term time machine, coined by Wells, is now almost universally used to refer to such a vehicle. Wells touches gently on time travel as a notion, but mostly *The Time Machine* is about the terminal future he sees for mankind: His nameless time traveler ventures to the world that will be 802,701 A.D., and there he finds mankind divided among the Eloi and the Morlocks. The Eloi are a gentle, winsome, idle race, who do not labor; the Morlocks, in contrast, are a barbaric race -- who use the Eloi for food. It's a grim vision, and a gripping one. There's a reason that *The Time Machine* has become a classic.

**none** Adventure A man's vision for a utopian society is disillusioned when travelling forward into time reveals a dark and dangerous society. **The Time Machine (1960 film) - Wikipedia** The Time Machine was the first of a number of these imaginative literary inventions.
